

TOOL MAKING & DESIGNING

JCP INDUSTRIES is one of the reputed manufacturers and suppliers of a range of superior quality tool and die making products in Coimbatore. Our company is completely involved in industrial art of manufacturing, different types of Plastic injection molds like,

- Two Plate Mold
- Three Plate Mold
- Side core Mold
- Unscrewing Mold
- Collapsible Mold

We work closely with our value clients in developing tools and die for various purposes. Similarly, we also develop molds and dies for our clients as per their demands and also undertake Reverse engineering, prototyping activities. To provide the same products to clients, we have our own manufacturing facilities which handled by our experienced and expert professionals.

AGRO INDUSTRY

Agriculture plastic components are reduce parts cost and weight of a structural parts with high impact.

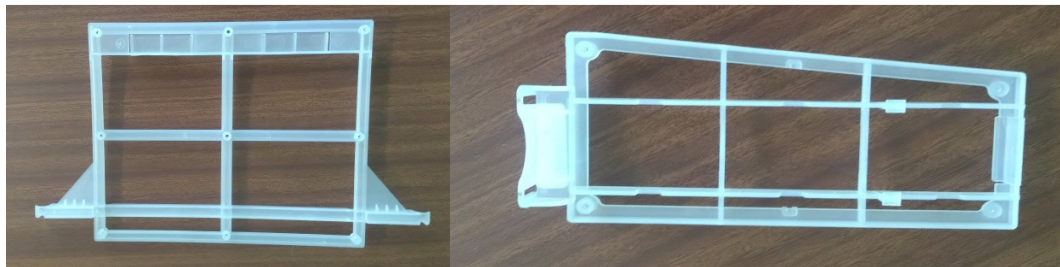

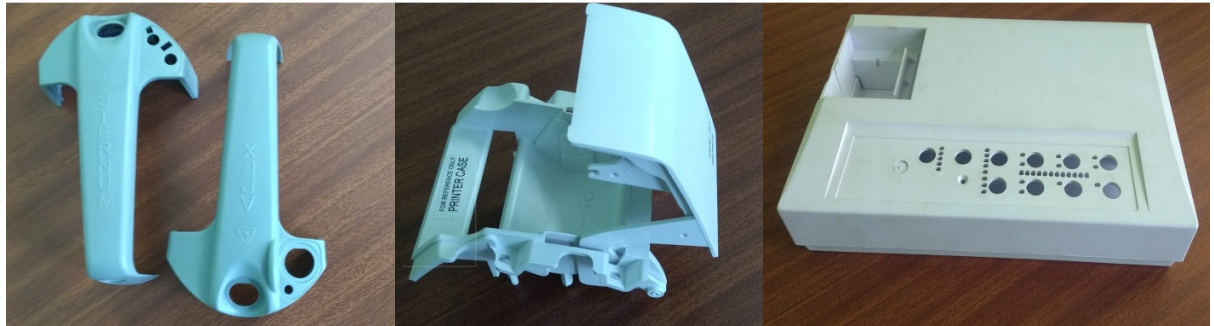

Plastics in agriculture have helped farmers increase production, improve food quality and reduce the ecological footprint of their activity. Not only do plastics allow for vegetables fruits and to develop pond aquaculture be grown whatever the season, but these products are usually of better quality than those grown in an open field and easy to use.

Medical Industry

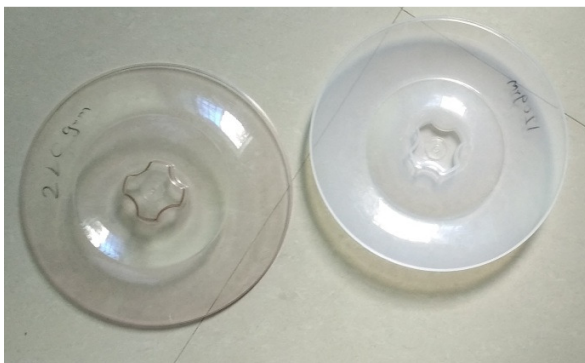

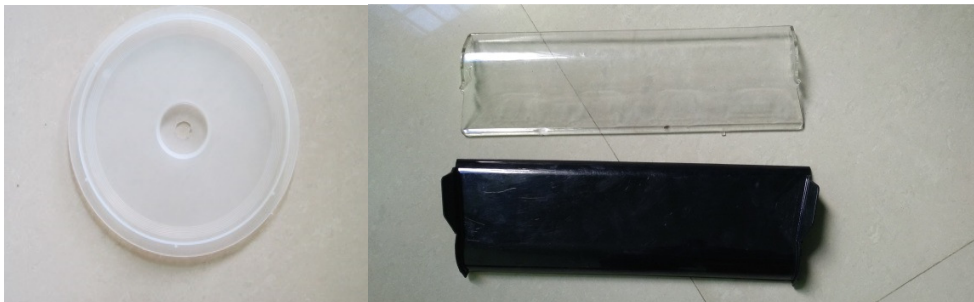

Plastic have reduced medical costs, reduced the spread of infectious diseases and served to reduce pain levels in patients. In other words, Plastic has improved the overall quality of care that patients receive. Despite earning itself a bad reputation, environmentally speaking, plastic has proven itself a life-saving material as far as the healthcare industry is concerned. A component in everything from Incubators, dialysis machines and implants, no other industry feels the heft of plastic more heavily.

Home appliances

We are the manufacturer of new appliance part designs to redesigns and improvements, Plastics serves the appliance industry with the latest Plastic injection molding technologies, materials and advanced part and mold design to provide the best quality components demanded by the highest quality appliance manufacturers around the world.

AUTOMOBILE

Plastics also provide lightweight packaging and vehicle weight reductions that combine to result in less CO₂ emissions linked to transportation. Replacing plastic packaging with alternatives would lead to packaging weight being multiplied by a factor of four if alternative packaging materials were used.

TEXTILE

We are the manufacturing and supplying of textile plastic components. Our Components are offered in different size specification as per the client needs.

These plastic products are light weight, smooth surface, moist proof and premium quality plastics.

PUMP INDUSTRIES

We are manufacturer of plastic spare parts for pumps in different size, Color and types like cooling fan, cooling cover, terminal boxes, etc.. As per our client needs.

These plastic components are used in different types of water pumps.

Electrical Industry

At custom advanced connections, we specialize in providing industrial-quality electrical components for customers working within a variety of industries.
