

**Shubham Industries will strive to manufacture superior quality products at affordable rates. This will be achieved through increasing production efficiency, improving production techniques and policies and reducing in-process rejection rate. Our quality system is developed to monitor and improve quality and production practices of our organization.**

**We manufacture all products in Brass, M.S., S.S., Aluminium as per drawings and specifications of our clients and our specialization in automobile components industry and electric parts industry. Experience of three decades helps us in development of new products as per the needs of our clients and are therefore not constraint with a few specialize products.**

**We are manufacturing wide range of products like:**

- **Electrical/Electronic Parts**
- **Automobile Components**
- **Sanitary Parts**
- **Pump parts**
- **CNC turned components & other engineering parts**

## **INFRASTRUCTURE**

Our strong infrastructure and advanced machinery helps in production at large scale and ensures that the delivery schedule is maintained.

### **Workshops**

- Four manufacturing units with advanced machinery and tools.
- Advanced plating plant.
- Trained operators and supervisors to control the production.
- Continuous inspection by highly skilled and experienced inspectors to ensure better quality.

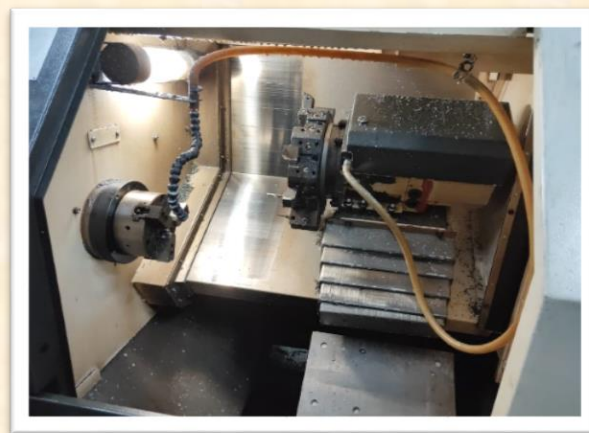

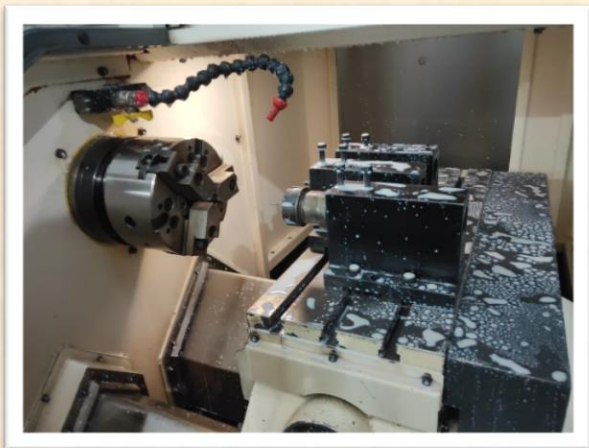

### **Foundry**

- In - house manufacturing of rods used to manufacture all components.
- We have total control over the quality of basic raw material i.e. rods and sections.
- The foundry has a capacity in excess of 1.5 ton per day.

### **Machinery**

Table giving details about machinery.

<b>Sr.No</b>	<b>Type of Machines</b>	<b>No. of Machines</b>	<b>Range</b>
1	CNC turning machine	11	200 X300 mm
2	Automatic turning Machines specialize to achieve production at lowest tolerances	10	12.5 mm
3	Hand operated machines for turning	07	50 mm
4	Hand operated machines for turning	15	12.5 mm
5	Hand operated machines for threading	03	50 mm
6	Hand operated machines for threading	05	12.5 mm
7	Hand operated machines for slots	02	12.5 mm
8	Hand operated machines for drilling	07	12.5 mm

We got various **CNC machines** which gives us desired Products as per our standards. We take care of precise design, dimensional precision, high tolerance in each & every product. We keep on researching and developing product with new Ideas & Techniques so that we can produce maximum quantity of products in a minimum time without any compromise with quality. We believe in keeping track of changing technology and are always in tune with the current requirement of industries.

## QUALITY POLICY

Being an ISO 9001:2015 certified organization, our goal is to be responsive to the needs of our customers by supplying the highest possible quality products on time with the best possible pricing and value.

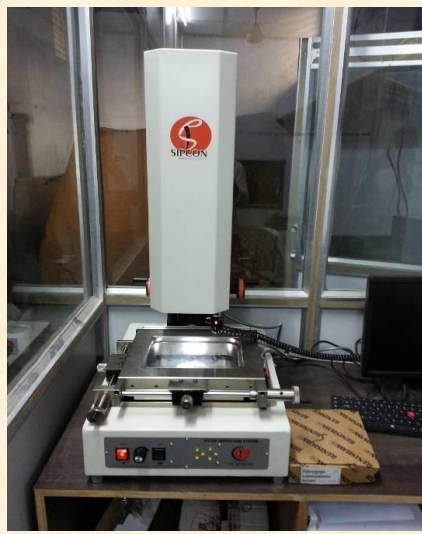

Shubham Industries is committed to continual quality improvement by improving productivity, reducing costs, increasing customer satisfaction and meeting our employees' expectations for training, safety and morale.

Shubham Industries will strive to manufacture superior quality products at affordable rates. This will be achieved through increasing production efficiency, improving production techniques and policies and reducing in-process rejection rate. Our quality system is developed to monitor and improve quality and production practices of our organization.

We have installed salt spray test machine and metal X-ray testing machine to ensure that the plating is most superior.

**To ensure good quality, apart from gauges and other instruments, we have installed**

**VISION INSPECTION SYSTEM (PROFILE PROJECTOR).**

# CERTIFICATE

**The Certification Body  
of TÜV SÜD South Asia Private Limited**  
certifies that

**Shubham Industries**  
C-2/61 - B, G.I.D.C., Udyognagar, Shanker Tekri,  
Jamnagar - 361004, Gujarat, INDIA

has implemented a Quality Management System  
in accordance with **ISO 9001:2015**  
For Scope of

**Manufacturing of Brass, Steel and Aluminium Machined Components for Automotive, Electronics and Electrical Industries.**

The certificate is valid From **2017-08-09** until **2020-08-08**  
 Subject to successful completion of annual periodic audits  
 The present status of this Certificate can be obtained on [www.tuv-sud.in](http://www.tuv-sud.in)  
 Further clarifications regarding the scope of this certificate may be obtained by consulting the certification body

Certificate Registration No. 99 100 10124

Date of Initial certification : 2008-08-09

Certification Body  
of TÜV SÜD South Asia Private Limited, Mumbai  
Member of TÜV SÜD Group

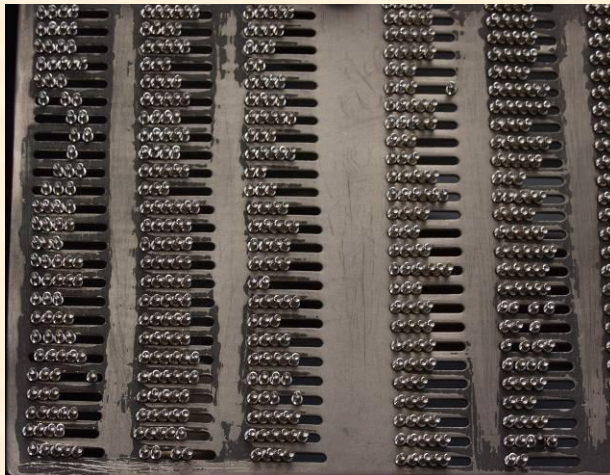

## Our Strengths

A production solution is the key to affordable quality. Finding solutions that are production friendly and also maintains the required quality is our strength.

Almost in all components manufactured, critical dimensions and specifications are 100 % inspected. For instant, 100% lot is inspected for threads in brass molding inserts. If possible, a production solution is developed to ensure that the critical parameter is maintained or else 100 % lot is inspected post-production.

An example of a production solution that has achieved both the goals of quality maintenance and affordable production is the production of one million contact pins per day and still 100% of lot is inspected for hole diameter. It is due to this production solution that the quality is not compromised and still production is maintained and made affordable.

Above picture shows that about hundreds of pcs are at once checked for hole and then cleared for plating and packing. The process is very rapid and lacs of pcs can be inspected within a matter of few hours. As the process is rapid, cost is less and it is ensured that the critical parameter of the product is as per requirement.

## PRODUCTS

We manufacture all products as per drawings and specifications of our clients and specialize in automobile components industry and electric parts industry. Experience of three decades helps us in development of new products as per the needs of our client and are therefore not constraint with a few specialize products.

Special products as per drawing and specifications catering to automobile and electrical parts industry:

### 1. SWITCH PARTS

- We manufacture brass switch parts as per our client's requirement.

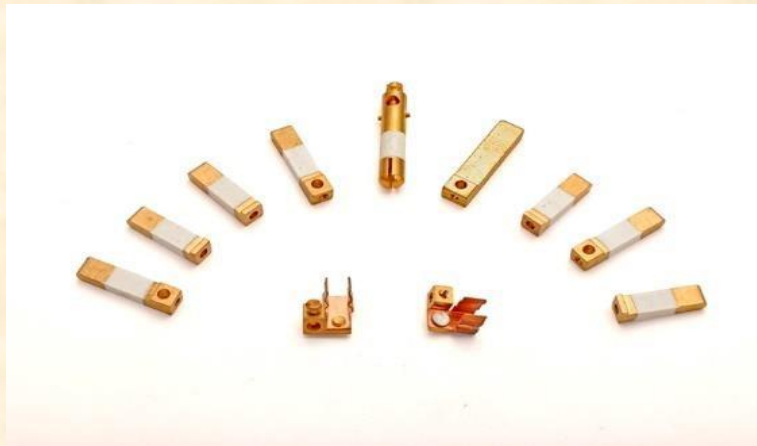

## 2. CABLE GLANDS :-

- Range of brass nickle plated cable glands for standard clamping to earthing of braid.
- PG IP-68, M PG-68, BW, CW, Single compression & Double compression range available

## 3. ELECTRICAL PLUG PINS :-

- The amp plugs are styled to provide a contemporary power unit to the home, office or work space.
- It provides good electrical conductivity through earth pin, neutral pin and live pin made of brass.

#### 4. TERMINAL BLOCK

- We manufacture terminal blocks used in various types of panels, Distribution box, etc...

#### 5. SOCKET

- Hole diameter and depth is maintained at a tolerance of 0.03 mm tolerance.
- The slots are parallel to the hole at top and cut each other at 90 degrees.
- The length of the slot is also maintained at 0.05mm tolerance.

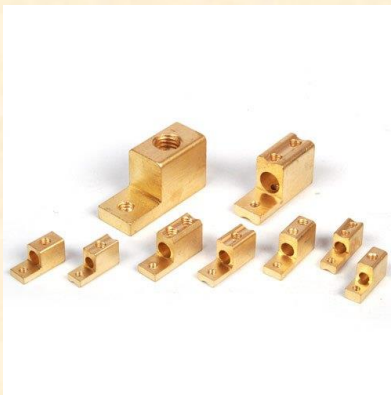

## 6. TEMPERATURE SENSOR BOLT

- Used to manufacture temperature sensors used by automobile industry. 3
- 100 % lot is inspected for hole diameter and depth, for threads.

## 7. BRASS MCB & CHANGEOVER PARTS: -

- Being a leader in the industry, we are engaged in offering a qualitative range of Brass MCB Switch Parts to our customers.

## 8. COPPER SPLIT BOLTS

- These high strength copper alloy split bolt connectors can be used with a range of solid copper wire, compact, compressed, copper-weld conductors.

## 9. LUGS

- Copper lugs are designed to offer maximum efficiency under heavy duty applications. The lugs are tin plated to avoid oxidization and to achieve maximum corrosion protection.

## 10. ENERGY METER PARTS :-

- Manufacturing different type of Brass & copper parts used in energy meters.

## 11. TERMINAL :-

- Used as critical part of starter motors.

## 12. PIVOT POST

- All the diameters have tolerance of 0.03 mm and the lengths of these diameter is concentric.

## 13. SOLENOID VALVES PARTS

- High precision brass components used as a part in solenoid valves.

#### 14. PUMP PARTS

- Manufacturing all Brass pump parts
- Perpendicular rotation assured in each piece.
- Various range of size available.

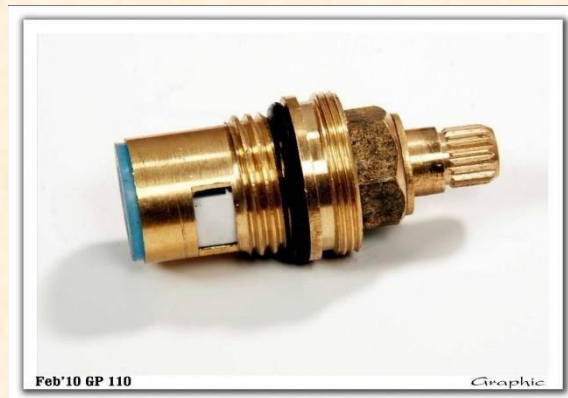

#### 15. BRASS RO PARTS

- Manufacturing various types of Brass RO ball valve.
- 100% leakage proof

## 16. CERAMIC SPINDLE VALVE

- Manufacturing a wide range of Brass ceramic Spindle.
- Used in Quarter-turn faucets and taps.
- Tested for leakage.
- Good quality rubber used to ensure long life.

## 17. HEX NIPPLE

- Manufacturing Hex nipple in different sizes
- Female & male both threads are available

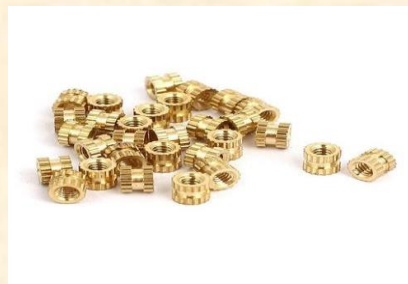

## 18. EXTENSION NIPPLE

- A Wide range of extension nipple available with CP
- Extension nipple are used to give extra length to female ends

## 19. MOULDING INSERTS

- We manufacture an impeccable range of brass male and female inserts, it is used in plastic boxes, junction box, Injection moulding, Machinery, etc...
- Available in straight and cross knurling, the products have a perfect brass and chrome finish.
- The entire range is available in designing the products according to customers' specifications.

## 20. BRASS BUSH

- Used in sanitary parts

## 21. BRASS NUT

## 22. PIPE INSERTS

- We manufacture an impeccable range of brass male and female inserts to be used as brass CPVC fittings & PPR Fittings and also moulding inserts which is used for electrical applications.
- Available in straight and cross knurling, the products have a perfect brass and chrome finish.
- The entire range is available in designing the products according to customers' specifications.

## 23. HOSE NIPPLE

- Various sizes available
- Machined to perfection and available in different forms with or without threads as per requirements.
- BSP, BSPT, NPT, metric thread available

We have a very huge product list. Some of our most popular product we mentioned here. The above shown components highlights the strength of Shubham Industries in manufacturing all kinds of products ranging from very small components to big components in all forging, casting and extrusion materials as per the requirement of clients. For any Queries contact us.
