

IGTR is instrumental in leading Gujarat industries to technology upgradation. Rapid growth of CNC technology in the area is due to us. Now we introduce Rapid Prototyping. The technology of tomorrow with RPT, one can indulge in product changes and have the prototype in hand next day morning.

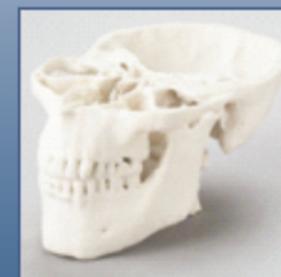

Miracle combination of CAD-PRT-CAE

We have equipped ourselves with latest software for Product Design combined with RPT facility and finally latest of CAE software. All this for you. Now you can assure that your product meets all requirements before you go for high investment.

Benefits of RPT

- ✿ Only CAD model required.
- ✿ Same day or next day delivery.
- ✿ Product cost reduction.
- ✿ Parts are good for functional testing.
- ✿ Possible to make one off or small batch production without die or mould.
- ✿ Part can be used as pattern to produce batch of metal cast parts.
- ✿ RPT models can be great help in medical field by way of getting real size model on table of what is inside the body and can help in studying problem well or planning complicated surgery.
- ✿ Making medical in plants.
- ✿ Can make otherwise not feasible shapes.

Who Can Use RPT

- ✿ Mechanical Industries
- ✿ Animation Industries
- ✿ Automobile Industries
- ✿ Aerospace Industries
- ✿ All type of Casting Industries
- ✿ Consumer Product Industries.
- ✿ Die and Mould Industries
- ✿ Plant Design Industries
- ✿ Geographical Innovation System (GIS) Industry
- ✿ Architectural Model
- ✿ Interior Design Model
- ✿ Medical Case Study
- ✿ Medical Inplants
